Future Problems With Medicated Feeds Are Noted by FDA Official

DURHAM, N.H.—"It looks as if we are going to have some problems with medicated feeds," declared Nevis Cook, chief of the Boston office of the U.S. Food & Drug Administration, when he addressed the ninth annual Poultry Health Conference at the University of New Hampshire here, Feb. 4-5.

"I certainly do not wish to be an alarmist," Mr. Cook said, "but some of the manufacturers apparently are not exercising the careful, exact controls that are essential for anyone who is manufacturing and marketing potent drugs."

The speaker reported that his department had received several complaints from poultrymen that eggs have turned white when their normal color was brown. He gave a drug as the reason and said his men had found it in feed "though it was not declared on the label and its presence resulted from an error in manufacture."

Mr. Cook also revealed that his department had discovered that some poultry farmers are paying no attention to label directions which warn that certain medicated feeds must be discontinued some days before slaughtering. He warned that such negligence may result in residues of the drugs in the edible tissues of treated birds and that unless such residues are permitted under published regulations, the poultry in question will become an "illegal article of commerce."

The speaker concluded that three steps are necessary if the regulations are to be carefully followed:

1. Feed manufacturers will have to accept their responsibility in the preparation and mixing of feeds and must label the feeds so that the farmer will know precisely what he is getting and how to use it.

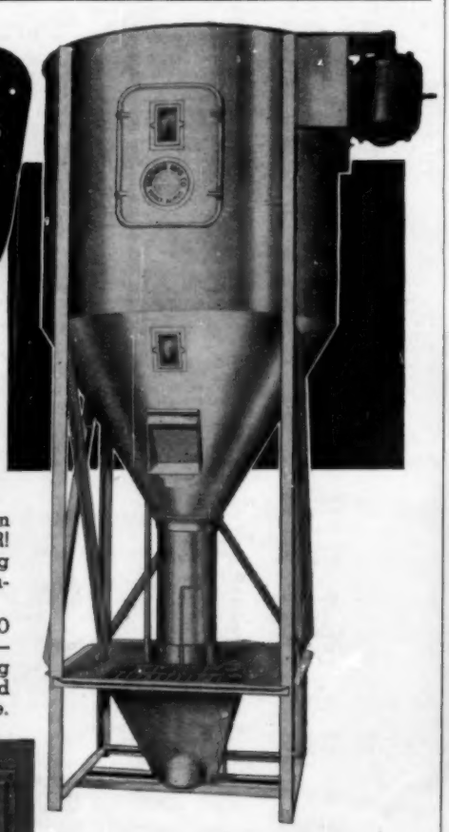
2. The farmer who uses the feed must read and heed the label directions and warnings provided by the manufacturer.

3. There must be an adequate level of enforcement of the rules by FDA and the state feed control officials.

"We saved a fat $300.. increased profits 20% with our BROWER MIXER

Says Harry D. Heist, President, A & C Feed Co., Cheyenne, Wyoming

"We bought a Brower because it ran about $300 less than similar mixers. As far as we can see after a year's hard run, we were right. It does a good job and gives no trouble; we saved a fat $300. We've increased our feed profits about 20% and are serving about 10 to 15% more customers."



BROWER
Whirlwind **MIXER**

Dependability, fast mixing action, and low cost operation make Brower the WORLD'S LARGEST SELLING MIXER! Brower action WHIRLS the ingredients instead of just stirring or tumbling them . . . produces the most thorough mix obtainable. Every sack has the same even mixture.

FAST and ECONOMICAL — a perfect blend in about 10 minutes at a power cost of only 3¢ to 5¢ a ton. Five sizes — 700, 1200, 2000, 3000 and 4000 pounds-per-batch mixing capacities. Above-floor and below-floor models. Heavy welded steel construction — built for years of trouble-free service.

Easy to get into through large hinged service door and hinged conveyor sleeve.

Note mixing paddle at top which WHIRLS the ingredients for the most thorough mix.

Glass observation window at eye level provides easy inspection of feed being mixed.

BROWER MFG. CO.

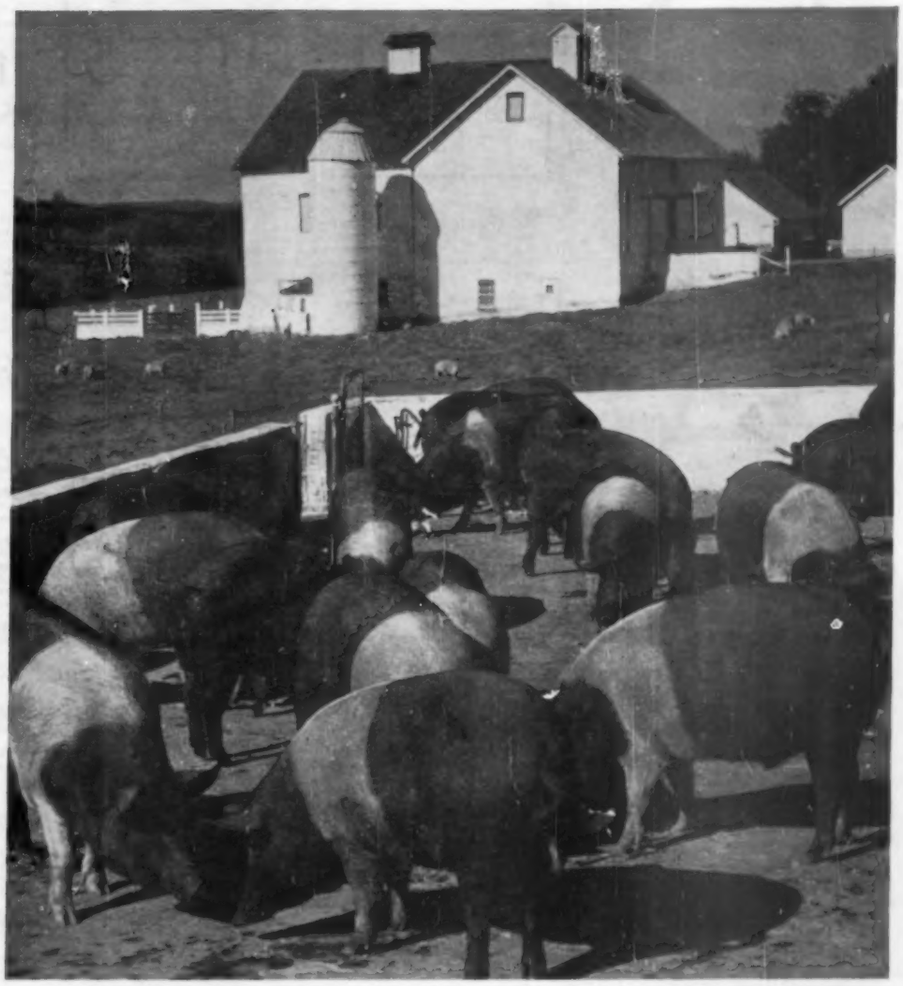
Absolutely New!

T-H

MIX FOR SWINE



NOW, without expensive, unnecessary overfortification or duplication of additives, you can customize your swine feeds to meet the exact needs of you and your customers! Simply use new T-H MIX — the combination feed and premix program for swine, poultry, turkeys, cattle, sheep, dogs and mink.

There are three T-H MIXES for swine: **No. 1** is for pig starter rations; **No. 2** is for pig grower, grower concentrates and pre-gestation and gestation rations; and **No. 3** is for pig finisher and finisher concentrates.

All three T-H MIXES for swine contain only the additives that sensibly belong in a premix. And when used in conjunction with the T-H swine feeding program, T-H MIX gives you customized feed formulation, without guesswork, without waste! You just select the one combination of ingredients in the T-H swine feeding program that's right for you, and your work is done. Because there's a T-H MIX for every growing stage, you can order a complete premix inventory — there's no piecemeal ordering, waste or unbalanced inventories.

SEAL OF T-H SERVICE

To better satisfy the needs of our customers, the Thompson-Hayward Feed Chemical Division maintains a skilled and highly-qualified staff of feed nutritionists. Constantly in touch with the numerous research programs being conducted by colleges and universities across the nation, this nutritional staff stands ready to supply any necessary information or consultation concerning state feed laws, disease control, specialized feed formulation, etc. It is the sole purpose of this staff to help you manufacture better feeds through more effective use of feed fortifiers. You are invited to take advantage of this service.

FEEDSTUFFS
A WEEKLY NEWSPAPER
For the Feed Manufacturer, Feed Jobber, Feed Broker and Feed Dealer

Index for February, 1960

Vol. 32 Nos. 6-9

ADDITIVES:
New York Meat Labeling Legislation ....Feb. 20—p 1
Drug for Medicated Dog Food Announced ....Feb. 20—p 4
Midwest Feed Manufacturers Assn. Convention ....Feb. 13—p 1
North Carolina State College Conference ....Feb. 13—p 70
Wisconsin Committee to Develop Policy on Chemicals..Feb. 13—p 83

ADVERTISING:
Midwest Advertising Council ....Feb. 20—p 58

ALFALFA:
Alfalfa Improves Hog Carcasses, Slows Gains ....Feb. 13—p 74
American Dehydrators Assn. Convention ....Feb. 6—p 1
Effect of Protein Level, Dehydrated Alfalfa on Reproductive Performance of Lactating Beef Heifers ....Feb. 6—p 86
Production of Alfalfa Meal Off in January ....Feb. 27—p 91
Putting Research to Work ....Feb. 6—p 22

AMINO ACIDS:
Correction Expected for Methionine Limit on FDA 'Safe' List ....Feb. 6—p 1
Putting Research to Work ....Feb. 27—p 44
University of Illinois Nutrition Conference ....Feb. 13—p 1
Utah Feed and Nutrition Conference ....Feb. 27—p 10

ANIMAL PRODUCTS:
Maryland Broiler Trial ....Feb. 6—p 26

ANTHELMINTICS:
Association of Southern Agricultural Workers ....Feb. 27—p 26
Drug for Medicated Dog Food Announced ....Feb. 20—p 4
New Hampshire Poultry Health Conference ....Feb. 27—p 91

ANTIBIOTICS:
Association of Southern Agricultural Workers ....Feb. 27—p 26
Cyanamid Gets FDA Okay on Pig Formula ....Feb. 27—p 59
Minnesota Sheep and Lamb Feeders Day ....Feb. 27—p 58
Montana Nutrition Conference ....Feb. 20—p 10
New Hampshire Poultry Health Conference ....Feb. 27—p 91
Ready-to-Use Form of Erythromycin Cleared ....Feb. 6—p 86
Study of Antibiotic's Effectiveness Over Long Period...Feb. 13—p 24

ARSENICALS:
Drug Status Not Changed by Law's March 6 'Deadline' ....Feb. 20—p 1

ASSOCIATIONS:
American Dehydrators Assn. (Convention) ....Feb. 6—p 1
American Feed Manufacturers Assn. (Poultry Industry Study) ....Feb. 6—p 1
(Feed Tonnage Report) ....Feb. 13—p 1
(Opposition to Meat Labeling Legislation) ....Feb. 20—p 1
(Staff Addition) ....Feb. 13—p 4
American National Cattlemen's Assn. (Convention) ....Feb. 6—p 64; Feb. 13—p 63

Why Grain Men Prefer

Owner's viewpoint

ARID-AIRE
GRAIN DRYERS

"We have been using ARID-AIRE dryers for the last 10 years at our elevator—we have been completely satisfied in every respect and honestly feel that the dryers have paid us many times over."

KERMIT LYNN, *Manager*
Lake Lillian Farmers Elevator Co.
Lake Lillian, Minnesota

ARID-AIRE is built to last and give trouble-free service, month after month — year after year . . . they pay for themselves!

Tank Institute Accepts Bulk Unit Members

CHICAGO—Expansion of association services to include dry bulk commodity highway tank vehicles was voted by members of National Truck Tank & Trailer Tank Institute at their annual meeting in Chicago. Before the work of the group had been limited to liquid highway tanks.

The institute has specialized in the development of safe specifications for flammable liquids.

While it is estimated that current members now produce more than 50% of the highway units used for hauling cement, feed, flour, sugar and other dry commodities, there are estimated to be 20-30 additional manufacturers specializing in bulk units who now become eligible for membership. The association feels "there is a big job to be done in improved engineering, improved design, and in standardization of common parts whereby the manufacturers would benefit."

Miles Promotion

ELKHART, IND.—Appointment of Wallace G. Schilstra to division controller of Miles Chemical Co., a division of Miles Laboratories, Inc., Elkhart, has been announced by the firm's president, Howard Roderick.

Mr. Schilstra will be responsible for all financial and accounting activities of the division. This includes those for the expanded citric acid operations in Elkhart, as well as the Sumner plants in Zeeland, Mich., and the Takamine plants, Clifton, N.J.

Mr. Schilstra has been controller and office manager of the Sumner plant in Zeeland since 1949.

FEED STORE OPENED

WICKENBERG, ARIZ.—Roy Courtney has opened Courtney's Feed Store here at 359 North Tegner.

FEEDSTUFFS—*LEADER in its field*

More advertisers use FEEDSTUFFS than any other publication in the feed industry

Wenger 50 SERIES

METERED FLOW PUMPS

Apply Any Liquid Feed Ingredient Into Hard Type Pellet Mills

Wenger Metered Flow Pumps make possible the injection of any liquid feed ingredient in the tempering chamber of roller type pellet mills, or in mixers not satisfactorily equipped with the best liquid control equipment, with assurance of absolutely uniform rate of delivery.

Available in models for molasses, animal fats, fish solubles, fermentation solubles, liquid wheys, vitamin feeding oils, etc., Wenger Metered Flow Pumps are produced in two sizes; the 50 Series (from 1 lb. to 6 gallons per minute) and the 55 Series (from 1 lb. to 14 gallons per minute). Positive adjustment of the rate of liquid flow at any desired rate of delivery. No variation of rate of pumping until pump is reset.

Write today for booklet describing installation—state production capacity and percentage of liquid to be incorporated into pellet mash.

Pfizer Sales, Earnings Rise in First Quarter

NEW YORK—First quarter sales and earnings of Chas. Pfizer & Co., Inc., were substantially higher than in the same period last year, John E. McKeen, president, told share owners this week at the annual meeting in Brooklyn.

World-wide sales of the drug and chemical firm were $68,722,000, compared with $60,547,000 in the first three months last year, an increase of 13.5%. Earnings were $7,102,000, up 12% from $6,339,000 and were equivalent to 43¢ per common share against 39¢ in the January-March period in 1959.

Mr. McKeen declared that "the company's operations are now well diversified, not only in terms of products, but also in terms of geographical areas. The over-all outlook is good, and we are cautiously optimistic about the balance of 1960."

About 2,000 share owners and guests attended the meeting at the Brooklyn Academy of Music and heard reports on the company's operations from Mr. McKeen and other Pfizer officials. The program was designed to acquaint them with the firm's global activities.

Among the directors reelected was J. Jerome Thompson, Pfizer vice president and general manager of the agricultural division.

MINNESOTA MILL SOLD

JORDAN, MINN. — Al Beckius, Jordan feed dealer, and Cy Hennes, New Prague feed mill operator, have purchased the Shakopee Feed Mill and Purina dealership. Selling the mill were Warren and Marvin Stemmer, who operated the Shakopee mill since 1946, when they took it over from their father, J. M. Stemmer.

Poultry Festival Set In South Carolina

CLEMSON, S.C.—Final plans have been worked out for the 1960 Poultry Festival to be held at the Batesburg-Leesville school grounds on Wednesday, May 11.

P. H. Gooding, Clemson poultry extension staff, says that the committees working on the festival met recently with Clyde Rauch, general chairman, to work out final details.

The festival will begin with a parade at 10:30 a.m., and will end with the crowning of the festival queen at a dance that night.

Mr. Gooding announced that B. W. Brookshire, Batesburg, is chairman of the beauty contest committee. Local hatcherymen, feed processors, dealers, or poultry processors are being asked to sponsor contestants in the beauty contest.

Honeggers' can help you . . .

DOUBLE YOUR TONNAGE TRIPLE YOUR PROFITS

What others have done, you can also do!

In the first nine months we sold Big "H" Feeds our sales more than tripled. We now sell them exclusively.
We also like the extra profits we make from our sales of Big "H" Livestock and Poultry Equipment, Honegger Farm Buildings and the National Champion Honegger Layers.
If you want to increase your sales, call your Honegger man.

Clarence Schmieding, Manager
Seward Co-op Oil Company
Seward, Nebraska

Why Grain Men Prefer

Owner's viewpoint

ARID-AIRE

GRAIN DRYERS

"We have been using ARID-AIRE dryers for the last 10 years at our elevator—we have been completely satisfied in every respect and honestly feel that the dryers have paid us many times over."

KERMIT LYNN, *Manager*
Lake Lillian Farmers Elevator Co.
Lake Lillian, Minnesota

ARID-AIRE is built to last and give trouble-free service, month after month — year after year . . . they pay for themselves!

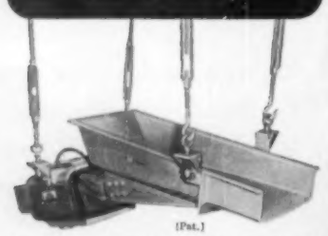
electro-permanent magnetic

BIG CAPACITY VIBRATORY FEEDERS



(Pat.)

Greatly increased capacity—up to 50 tons per hour • Enclosed drive element is furnished as *standard* • New A.C. electro-permanent magnetic drive • No rectifier needed—operates directly off an A.C. line • Laminated fiberglass leaf springs resist breakage • Suspended or floor-mounted models • Low power consumption; low operating and maintenance costs • Automatic, accurate, variable rate of feed for all bulk materials (fine powders to large, lumpy materials) spreading, aerating, cooling, proportioning, etc.

Special units available for hazardous, dusty locations—fully accepted by Mill Mutual. Other models available, with feeding capacities ranging from tons to ounces per hour.

Eriez Mfg. Co.
118-EA Magnet Drive, Erie, Pa.

Honeggers' can help you . . .

DOUBLE YOUR TONNAGE TRIPLE YOUR PROFITS

What others have done, you can also do!

In the first nine months we sold Big "H" Feeds our sales more than tripled. We now sell them exclusively.
We also like the extra profits we make from our sales of Big "H" Livestock and Poultry Equipment, Honegger Farm Buildings and the National Champion Honegger Layers.
If you want to increase your sales, call your Honegger man.

Clarence Schmieding, Manager
Seward Co-op Oil Company

Slight Cattle Price Reduction Likely

WASHINGTON—The gain in cattle and calf supplies seems likely to bring some reduction in prices, but the declines are not expected to be large, the U.S. Department of Agriculture reports.

USDA also notes in a livestock and meat situation report that the impact will not be the same on all classes.

In view of the outlook for fed cattle marketings this spring, price prospects for fed cattle now appear to be less favorable than previously indicated, USDA says. Some small price declines are likely, somewhat like price trends during the past two years when choice slaughter steers declined $1.50-$2 cwt. from April to June. These declines will, of course, mean lower feeding profits and reduce the demand for replacement cattle, USDA notes.

However, the need for cattle to put on spring pastures will continue strong. Prices of these classes are probably near a seasonal high and should hold up well until marketings increase this summer.

Fed cattle marketings in the second half of 1960 will probably exceed last year by a considerable margin. Moreover, the probability of a sizeable gain in grass cattle slaughter points to poor prospects for late-summer recovery in fed cattle prices. More probable is a fairly stable price the last half of this year. Prices may continue below year-earlier levels though the difference late in the year will be less than it has been so far in 1960.

A favorable factor in the price outlook for beef is the prospect for a further strengthening in demand, USDA notes. Purchasing power per person has increased about 2% in the last year. Further increases are likely in view of the upward trends in employment and wage rates. Also declines in the output of pork will probably stimulate demand for beef.

The slaughter rate for cattle and calves thus far this year indicates that the buildup in cattle inventories during 1960 will be somewhat smaller than the 4.9 million head added during 1959. Heavy marketings of fed cattle, plus substantial imports of processing meats have kept prices below last year and the rate of expansion seems to be slowing.

J. O. Kumpe Appointed To Broiler Unit Post

RICHMOND, VA.—J. O. Kumpe, Sr., Bentonville, Ark., has been appointed manager of the midwestern region for the National Broiler Council, Frank Frazier, executive vice president, has announced.

A graduate of the University of Arkansas in 1933, Mr. Kumpe was formerly a marketing specialist, first with the Arkansas Agricultural Extension Service, and later with the U.S. Department of Agriculture. For the past 15 years he has managed a cooperative poultry processing plant in Bentonville. He served as president of the Arkansas Poultry Federation in 1956-57, and previously was president of the Southwestern Poultry Assn.

He assumed his duties May 1, and will have many of the responsibilities assigned to Max Bordner, Springfield, Mo., prior to his resignation last fall.

Dow Plans Zoamix Plant in Canada

SARNIA, ONT.—A plant to produce Zoamix will be built here by Dow Chemical of Canada, Ltd., it was announced May 11 by the company's president.

Zoamix is marketed as an additive to poultry feeds. It is used in these feeds as an aid in the prevention of coccidiosis. Dow introduced Zoamix in Canada in 1958.

Miles Chemical Makes Organization Changes

ELKHART, IND.—A major administrative and marketing realignment consolidating all phases of marketing and sales of Miles Chemical Co. under one head has been announced by H. F. Roderick, president of the firm.

W. J. Ferracone, formerly sales manager for Takamine Laboratory, has been named general sales manager of Miles Chemical. The present sales forces of Sumner Products and Takamine Laboratory will combine to become the basic sales force handling all Miles Chemical products, including citric acid, enzymes, dialdehyde starch and fine organic chemicals.

The unification of all components of sales and marketing into a single, larger entity will provide over-all strengthening in marketing, product development, research, sales and customer service, according to the firm.

Miles Chemical Co., division of Miles Laboratories, was formed in 1959 through the consolidation of Sumner Chemical Co., Zeeland, Mich., Takamine Laboratory, Clifton, N.J., and Citric Acid production in Elkhart. At that time, Mr. Roderick was named president, with administrative and marketing headquarters in Elkhart. Takamine Laboratory is a pioneer in the development of commercial enzymes.

FEED MILL OPENS

STATE CENTER, IOWA—Many farmers, livestock feeders and businessmen recently attended the grand opening and open house of the new Goodman Milling, Inc., feed mill here.

"You tote the money... I'll carry the goods!"

"And we'll both do a perfect job... thanks to the Chase Standards Laboratory!" Chase buys many of its bagmaking materials on the open market...and has "the pick of the crop!" Materials must measure up to stringent tests. Result: whatever your product—and whatever the economics of packaging it—there's a Chase bag of maximum strength to do the job with unusual economy. Attractiveness is part of every Chase package, too—thanks to unique printing skills, experience and facilities. Call the Chase Man in your area—or write us for full information about your packaging requirements.

Profit More With Hi-Mo-Lass

More and more dealers are making handsome profits by handling HI-MO-LASS. This dried molasses product is fine grained, dry and dustless; guaranteed free-flowing in any weather . . . a perfect feed supplement, an ideal silage preservative. Available in either pellet or regular form. With 42% or more sugar content and rich in natural minerals, HI-MO-LASS is a product that will make money for your feeders . . . making repeat sales a sure thing.

FREE GIFTS

Buy HI-MO-LASS and receive valuable free gifts! With the purchase of a ton or more, you will be given your choice from such items as watches, fishing rods, golf carts, electric shavers and many more similar premiums. Ask for our free gift order form containing the complete details.

We Will Make Your Own Brand

You manufacturers who would like to add a fast-selling dried molasses product to your feed line, can do so with ease. Blackstrap molasses with corn oil meal or soybean millfeed can be made under your label. Contact us for full particulars.

Kansas Study Shows Trace Minerals Help Cut Cattle Shrinkage

MANHATTAN, KANSAS — Research at Kansas State University indicates that trace minerals in a ration can significantly affect the amount of shrink that occurs when cattle are shipped to market.

Most satisfactory results in cutting down shrinkage through the use of trace minerals has been noticed with corn rations. Tests are not complete yet, but it appears that results with grain sorghum rations are inconsistent. And experiments with cattle on pasture have not shown that trace mineral supplementation increases gain.

Test Conditions

Twenty-four Hereford steers averaging 550 lb. were wintered at Manhattan from November, 1957, to May, 1958. Then, the cattle were divided into two groups.

One group received a mixture of plain salt and bonemeal while the second group had access to a mixture of trace mineral salt and bonemeal. The cattle remained on adjoining pastures until the summer of 1959. During the winter periods, each steer received 1.5 lb. of soybean oil meal per day. Native hay was fed when snow covered the pastures.

In 1959, the two groups of steers were weighed off pasture and hauled directly to Manhattan, located 134 miles away. Here is how the shrinkage compared with the two groups:

The control steers showed an average shrink of 47.5 lb., or 5.3%, during the trip. The steers receiving trace mineral salt showed an average shrink of 25.8 lb., or 2.9%.

During the following week, the control calves showed a further loss of 16 lb. each, while those receiving trace mineral salt lost only an average of 11 lb. each.

There was no significant difference in gains between the two groups during the finishing period, the investigators report.

Shrink Measured Again

Then, shrink was measured again when the cattle were shipped to a market 125 miles away. The control calves showed an average shrink of 65 lb., or 5.7%, and the animals receiving trace minerals recorded an average shrink of only 54 lb., or 4.5%.

The finishing period for this group of steers lasted 90 days. During this time, the control lot received plain salt and a plain salt-bonemeal mixture, while the test lot was given a trace mineral salt and also a trace mineral salt-bonemeal mixture. The ration included ground corn, prairie hay, and 1 lb. of soybean meal per head daily. Each pound of soybean meal contained 10 mg. of diethylstilbestrol. After 3 weeks, corn and prairie hay were available on a free-choice basis.

While the animals were on pasture, no significant differences in gain were noticed between the two lots.

A summary of the over-all gains from May, 1958, to November, 1959, shows that calves receiving trace mineral salt averaged 56 lb. heavier than control calves at the end of the period. However, the great difference between gains of individuals within each group causes one to question the validity of the average figures, say the researchers.

THE LOW COST WAY TO BUILD BULK FEED SALES

PERFECT FOR SMALL OPERATOR — EXCELLENT AS STANDBY UNIT

Simplest and Most Economical Way to Convert to Bulk Delivery

- Can be mounted locally — detailed instructions included.
- Unloads 1,000 lbs. per minute.
- Handles molasses feeds easily.
- Can be mounted on left or right side of truck
- 6" auger easy to attach or detach from truck.
- Complete hydraulic operation means less operating cost.
- All models come complete with hoses, power take-off, and hydraulic pump.
- Fills 12 ft. bins with standard auger — 16 ft. bins wih 6 ft. folding extension.
- Models available for trucks with hoist.
- The U-2 model can be used to load trucks.
- Mounting is easy! Simply cut hole in floor and bolt trap unit on underside.

Quick couplers for hydraulic lines, optional. A simple ratchet chain hoist raises and lowers the auger.

WRITE, WIRE OR PHONE COLLECT

for further information about the U-2, 4, 6 unloaders, plus a full line of bulk feed bodies, bulk sack bodies, bulk fertilizer bodies, and the new Simonsen Feedilizer, a bulk feed bulk fertilizer body. All Simonsen equipment is performance-tested.

QUALITY MAKES THE DIFFERENCE

Midwest
SWEET-DRIED
WHOLE
WHEY

ONE economical ingredient to meet the most critical requirements of farm for baby animals

TWO

TOP NUTRITION

High level of Lactose — the most readily digested carbohydrate for all young animals. Plus — high quality milk protein, natural milk minerals and vitamins.

PALATABILITY

The sweeter taste of fresh, low acid, low ash, roller dried whole whey adds more taste appeal for greater early feed consumption.

Turn the Cow to Your Feed Bag, and Keep Them

BOWMAN PRODUCTS

BoDEE (Mineral) STABLE VITAMINS D
Vita D that will not decompose when combined with minerals.

BoDEE
Vitamin D-2 or D-3 in dry, oil or water dispersible forms.

BoA-S and Bo-A
Stable dry vitamin A products.

BHT
Oil soluble Vitamin protector and pigmentation aid.

HYDROFOID
Dry, free-flowing partially hydrogenated animal fat.

XANTHOPHYLL CONCENTRATES
For better poultry pigmentation.

CLOROFOLEN
Effective dog food deodorant.

ENZYMATIC SYSTEMS

Bowman Feed Products, Inc.
130 Central Ave. HOLLAND, MICH.

For the Feed Manufacturer, Feed Jobber, Feed Broker and Feed Dealer

Index for June, 1960

Vol. 32 **Nos. 23-26**

ADDITIVES:
Chemical Additives Vital to Poultry Industry .....June 4—p 84

ALFALFA:
Colorado Studies Alfalfa in Pig Rations .....June 11—p 16
Dehy Production, Disappearance High .....June 4—p 58

AMINO ACIDS:
High Protein-Urea Supplements With and Without Lysine for Fattening Steer Calves .....June 11—p 55
Protein and Amino Acid Nutrition of Turkeys .....June 4—p 46

ANTIBIOTICS:
Antibiotic Combination Improves Calf Growth .....June 25—p 10
Idaho Manufacturer Tells of Sheep Rations .....June 18—p 90
Iowa Cattle Feeders Day .....June 25—p 1
Kansas Livestock Feeders Day .....June 11—p 32
New Antibiotic Boosts Calf Gain .....June 25—p 6
Putting Research to Work .....June 18—p 70
Results of Test With Aureomycin .....June 18—p 41

ARSENICALS:
Abbott Outlines Arsenical Developments .....June 25—p 7
Animal Health Institute .....June 18—p 4

ASSOCIATIONS:
Alabama Poultry Industry Assn. (Meeting) .....June 25—p 8
American Feed Manufacturers Assn. (Award) .....June 25—p 4
Animal Health Institute (Studying Arsenicals) .....June 18—p 4
Arkansas Poultry Federation (Festival Planned) .....June 18—p 7
Central Retail Feed Assn. (Meeting) .....June 11—pp 1, 6
Colorado Grain, Milling & Feed Dealers Assn. (Secretary) .....June 11—p 4
Eastern Federation of Feed Merchants (Meeting, Officers) .....June 18—p 1
(Poultry Industry Trends) .....June 25—p 1
Grain & Feed Dealers National Assn. (Booklet) .....June 18—p 6
Granite Grit Institute (Bibliography) .....June 18—p 35
Indiana Grain & Feed Dealers Assn. (Meeting) .....June 25—p 4
Indian Jute Mills Assn. (Joins Burlap Council) .....June 18—p 53
(Jute Problem) .....June 11—p 4
Institute of American Poultry Industries (Appointment) ..June 18—p 82
Kansas Poultry Assn. (Objects to "Loss Leaders") ...June 18—p 74
Manufacturing Chemists Assn. (Officers) .....June 25—p 81
National Broiler Council (New Finance Plan) .....June 11—p 56
National Cottonseed Products Assn., Inc. (Meeting)...June 11—p 79
National Feed Ingredients Assn. (Appointment) .....June 11—p 4
Northeastern Poultry Producers Council (Training) ...June 18—p 30
Ontario Retail Feed Dealers Assn. (Sponsors School) ..June 18—p 10
Oregon Feed & Seed Dealers Assn. (Committee Chairmen) .....June 11—p 93
Pacific Northwest Grain Dealers Assn. (Officers) ....June 18—p 8
U.S. Feed Grains Council (Market Goals) .....June 18—p 1
Washington State Feed Assn. (To Sponsor School)...June 11—p 4

California Dairymen Use Pelleted Feeds

KEYES, CAL.—As dairies increase in size in this area, the owners are turning toward bulk handling of feed. While several small operators have quit, the number of cows per herd has steadily increased.

There has also been a trend toward using feed in pelleted form, according to Henry Kamps, manager of the Berry Seed & Feed Co., in Keyes.

"Pellet feeding is being used for all types of dairy cattle," he said. "After putting in a new 100-h.p. pellet mill, we found it was about the busiest piece of equipment we had. We experimented with several pellets, but finally decided upon a 3/16-inch size, as this is what most dairymen prefer."

Mr. Kamps says dairy owners are looking for better feed conversions and more convenient methods of handling feed. A man with 100 cows can usually put in bulk facilities and make back his investment in a year's time because of the labor saved.

Here's the professor's advice to the feed manufacturer . . .

. . . "I believe there is little doubt but what Feedstuffs is the business publication which would best serve your needs. This is an outstanding publication without rival within its field. I am sure it will fulfill your interest in 'ingredient market news, services available, technical information, innovations, etc.'"

So wrote a professor of animal science at a large midwestern university in response to a letter from a Jamaican feed manufacturer asking which magazine would be most helpful in his business.

There are a lot of hard-headed businessmen in the feed industry who agree with the professor . . . nearly 14,000 of them subscribe to FEEDSTUFFS . . . because it helps them keep abreast of their fast-paced industry.

You can begin receiving your own personal copy of FEEDSTUFFS . . . your own complete source of industry news . . . 52 information-packed issues a year for only $5.

Southern States Co-op Announces Refund

RICHMOND, VA. — Southern States Cooperatives board of directors has authorized the payment of a patronage refund of 0.5% to patrons on their dollar volume of purchases for the fiscal year ending June 30, 1960, according to a report in the July 11 issue of the Southern States Cooperative Service Guide.

The patronage refund of the cooperative will be paid 75% in cash and 25% in capital book equities. None of the refund this year will be paid in the form of common capital stock.

The refund on grain marketed during the fiscal year has been determined to be 0.6 per bushel of grain marketed. This refund will be paid in cash.

Managers Named

FORT DODGE, IOWA — Quaker Oats Co. has announced several changes in managers of its country elevators in the Fort Dodge district along with a change of name to the Central Farm Service Division, handling both the operations of its country elevators and central feeds division.

Vernon T. Boes, elevator agent at Emmetsburg, has been named assistant to the manager at Fort Dodge, and Ronald W. Neal has been named feed sales manager of the Fort Dodge district.

Clyde A. Bavender has been named elevator manager for the Fort Dodge district and Arthur J. Boland, elevator manager for the Lake City district. Clement E. Milder has been named agent at Emmetsburg.

Denver Office

MINNEAPOLIS—An office to engage in purchase and sale of western and midwestern grain has been opened in Denver, Colo., by Cargill, Inc., nationwide agricultural products firm with headquarters here.

Flint E. Harding, Jr., who transferred early in July from a post with the firm's grain export installation in Baton Rouge, La. has been named manager of the new office, at 319 Symes Building, Denver.

The announcement, by grain division vice president H. Robert Diercks, said Michael E. Ragen will move from a merchandising position in Norfolk to replace Harding in Baton Rouge.

Salt Shipping Change

SALT LAKE CITY—Salt destined for feed mills of the Pacific Northwest now is being shipped out of Utah by a new direct service trucking system. Utah Pacific Lumber Transport Co., Portland, Ore., operating in nine western states, has begun shipment to Washington and Oregon plants.

Formerly salt from producers along Great Salt Lake moved to the northwest by rail. "Motor service will greatly reduce the time in transit and provide direct delivery to off-rail customers," according to Foley C. Richards, sales manager of Solar Salt Co. here.

A man should never tear his hair
When jilted by his lady fair
She isn't apt to be enthralled
The least bit more if he is bald.

A dapper city dude bought an old broken-down horse from a cattleman who was glad to get rid of it for a pittance.

"What in the world are you planning to do with that old nag?" the cattleman asked.

"I'm going to race him," the dude said.

"Well," the cattleman said, "you'll win."

Why Grain Men Prefer

Owner's viewpoint

ARID-AIRE
GRAIN DRYERS

"We have been using ARID-AIRE dryers for the last 10 years at our elevator—we have been completely satisfied in every respect and honestly feel that the dryers have paid us many times over."

KERMIT LYNN, *Manager*
Lake Lillian Farmers Elevator Co.
Lake Lillian, Minnesota

ARID-AIRE is built to last and give trouble-free service, month after month — year after year . . . they pay for themselves!
